EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: On page 1, after the title, the following passage has been inserted: - -

This application is a 371 of PCT/NL99/00568, filed September 13, 1999. - -

REASONS FOR ALLOWANCE

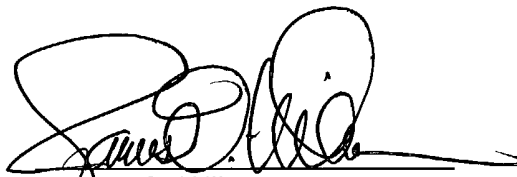

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of the claims is the inclusion in the process of using divalent copper ions catalysts at an amount from about 5 ppb to about 5000 ppb based on the dry substance of starch, which is a concentration that is not taught or suggested in the prior art. For example, see Table 1, sample D of the Lotzgesell et al patent (U.S. 3,975,206), which sets forth a concentration for copper catalyst at 32 ppm. The use of a catalyst in an amount, which is on an order of magnitude of 100 times less than that seen in the prior art is seen to be a patentable limitation, rendering the instant methods unobvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
